See product user manual for iMS approved disinfectant agents.

INSPIRIT MEDICAL SOLUTIONS

iMS Premium Fabric

Available on: Gynecology Chairs, Treatment Chairs, Patient Transport Stretchers, Delivery & Maternity Beds

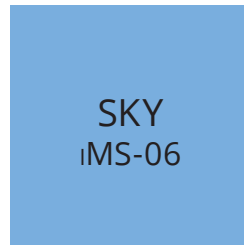

Durable & Long-lasting · Soft & Comfortable

This 100% Phthalate-free premium fabric with polyester/cotton backing is harmless to the environment and is designed to meet the requirements of medical facilities.

Fire Testing Standards:

**Patient Transport Stretchers
Delivery & Maternity Beds**
16 CFR 1632, ASTM E 1590

**Gynecology Chairs
Treatment Chairs**
NFPA 261, ASTM E 1537, CA TB 133

iMS Operating Tables

Fabric: DARTEX CON 406 fabric in black color only

Waterproof fabric, semi-vapor permeable, anti-static, and anti-fungal treated. Welded seams prevent the penetration of liquid into the mattress to assist with infection control. Pads are easily cleaned with iMS approved disinfectant agents.

Padding: foam density 35kg/m³

A high quality 2" two-layer foam pad for patient comfort and durability.

Upper layer: .8" Viscoelastic polyurethane foam that responds to the temperature and pressure of the patient's body, allowing for a perfect fit to the body shape and for better weight distribution over the entire surface of the pad.

Bottom layer: 1.2" T35 standard polyurethane foam for pad durability.

Fire Testing Standards: NFPA261, ASTM E 1537, CA TB 133

iMS Hospital & ICU Beds

Fabric Cover: Dahlia T70 fabric in white color only

Polyester backing coated with Polyurethane. Water vapour permeable with antimicrobial protection. Meets Biocompatibility and cytotoxicity requirements.

Padding: foam density 35kg/m³ - hardness 150N

Flexible polyurethane height resilience polyether foam (PUR). Produced by using slabstock technology without using any fluorocarbons (freons), nor with volatile organic solvents (eg. Methylene certified anti-microbial protection/hloride). Certified antimicrobial protection.

Fire Testing Standards: 16 CFR 1632, ASTM E 1590
